New Measures of Japs -Will Double Strength of the Army and Navy

London, July 8.—The measures for perfecting the national defense of Japan were decided upon and a plan for co-operation between the army and navy was adopted by the council of Field Marshal and Admiralty recently in Japan, says a dispatch to the Times from Tokio under date of July 1. The army, it was stated, will comprise 21 corps, with two divisions to the corp and three regiments to the division. Changes will not necessarily be effective immediately.

The Times computes that the new measure will double the strength of the Janese army.

TEMPERANCE BILL MORE RIGID THAN EVER DECIDED ON

EVER DECIDED UN

[BY ASSOCIATED PRESS.]

Wathington, July S.--Legislation prohibits the sale of distilled liquor, wine and beer after January 1, 1919, and to prohibit the manufacture of wine and beer after November 1 next was agreed upon today by the senate agricultural appropriation bill which lation is proposed as a substitute for the pending Norris amendment to the agricultural appropriation bill which stopped the sale of distilled liquor and wine on Jun 30, 1919 and prohibits the manufacture of beer three months after the bill becomes law. Provision for the exportation of liquor already produced was considered by the committee and probably will be reported in some other form before the senate acts on the amendment.

The changes have been discussed for a number of days so when the committee met today action was practically by unanimous consent without a record vote. By fixing a definite date after which, the sale would be prohibited of all intoxicating liquor members of the committee being in charge of discrimination would be void. They say wine growers would be able to dispose of this year's crop while brewers could make use of their entire supply of malt.

MICHIGAN STIRRED UP OVER COMING ELECTION

[BY ABSOCIATED PRESS.]

Letroit, July 8.—Developments that and no precedent in the political history of the state have given Michigan's primary campaign this year an unusual interest which centers largely in the race for the senatorial nomination. The primary election will be held August 27.

The democrats in state conference precipitated a situation that promises to upset early calculations. The conference endorsed Henry Ford, as democratic candidate for the senatorial memination, despite the fact that he had been regarded as a republican bessibility, and invited the republicans is unite with them in supporting him. Then came Ford's announcement, after a conference with President Wilson, that he would accept the nomination if it were tendered him. He would make the race as a republican or democratic candidate, and the situation was further complicated.

The action of the democratic state conference has been denounced by Michigan republicans as an attempt to spill their party. Chase S. Osborn, former governor and a candidate for the republican candidates withdraw from the race, and has indicated his intention of making a vigorous cambedined faitly to accept the democratic proposal that he with two other republican candidates withdraw from the race, and has indicated his intention of making a vigorous cambedine. Fred M. Warner, also a former governor, who had announced his candidate, withdrew from the race, and the withdrawal a sixtement supporting Ford as the republican, but not the democratic candidate.

Are the Packers Profiteers?

Plain Facts About the Meat Business

The Federal Trade Commission in its recent report on war profits, stated that the five large meat packers have been profiteering and that they have a monopoly of the market.

These conclusions, if fair and just, are matters of serious concern not only to those engaged in the meat packing business but to every other citizen of our country. The figures given on profits are misleading and the statement that the packers have a monopoly is unsupported by the facts.

The packers mentioned in the report stand ready to prove their profits reasonable and necessary.

The meat business is one of the largest American industries. Any citizen who would familiarize himself with its details must be prepared for large totals.

The report states that the aggregate profits of four large packers were \$140,000,000 for the three war years. This sum is compared with \$19,000,000 as the average annual profit for the three years before the war, making it appear that the war profit was \$121,000,000 greater than the pre-war profit.

This compares a three-year profit with a one-year profit —a manifestly unfair method of comparison. It is not only misleading, but the Federal Trade Commission apparently has made a mistake in the figures themselves.

The aggregate three-year profit of \$140,000,000 was earned on sales of over four and a half billion dollars. It means about three cents on each dollar of sales-or a mere fraction of a cent per pound of product.

Packers' profits are a negligible factor in prices of live stock and meats. No other large business is conducted. upon such small margins of profit.

Furthermore—and this is very important—only a small portion of this profit has been paid in dividends. The balance has been put back into the businesses. It had to be, as you realize when you consider the problems the packers have had to solve—and solve quickly—during these war years.

To conduct this business in war times, with higher costs and the necessity of paying two or three times the former prices for live stock, has required the use of two or three times the ordinary amount of working capital. The additional profit makes only a fair return on this, and as has been stated, the larger portion of the profits earned has been used to finance huge stocks of goods and to provide additions and improvements made necessary by the enormous demands of our army and navy and the Allies.

If you are a business man you will appreciate the significance of these facts. If you are unacquainted with business, talk this matter over with some business acquaintance—with your banker, say—and ask him to compare profits of the packing industry with those of any other large industry at the present time.

No evidence is offered by the Federal Trade Commission in support of the statement that the large packers have a monopoly. The Commission's own report shows the large number and importance of other packers.

The packers mentioned in the statement stand ready to prove to any fair minded person that they are in keen competition with each other, and that they have no power to manipulate prices.

If this were not true they would not dare to make this positive statement.

Furthermore, government figures show that the five large packers mentioned in the report account for only about one-third of the meat business of the country.

They wish it were possible to interest you in the details of their business. Of how, for instance, they can sell dressed beef for less than the cost of the live animal, owing to utilization of by-products, and of the wonderful story of the methods of distribution throughout this broad land, as well as in other countries.

The five packers mentioned feel justified in co-operating with each other to the extent of together presenting this public statement.

They have been able to do a big job for your government in its time of need; they have met all war time demands promptly and completely and they are willing to trust their case to the fairmindedness of the American people with the facts before them.

HARVEST TIME

It's gettin on to harvest time, the heavy wor office whose record is so radically wrong that kis nomination would be objectionable and dangerous to the community, it is safe to say the usual "so much per line and extra for top of column, and all payable in advance," will be the reply of many an aspiring citizen who wishes to rule the universe. It is a rare time for asplring politicians to run. Beyond the ago of the draft, too old to enlist. the age of the draft, too out to enist, they can claim the prestige of able service and seek preferment. Favor-ite sons and far away sons, they all should look alike to the newspaper should look atthe to the newspaper publisher who watches the cost end of his weekly payroll, and he should not be swayed by political and per-sonal friendship. The man who is ready to sacrifice his business for publie office is expuble of paying the freight and if he is not he certainly is roing into politics for revenue only is going into politics for revenue only and is not wanted. There are a tot of these aspirations that will be alphed by the early frost in the September primaries and the state and county where they are created will be the better off for this early frost. In the dis-tricts where easter beans were being produced for oil for airplane motors, the yarn was whispered into the ears of the farmers that these plants would exhaust the soil. In many places the propaganda morely takes the general form of growling about the constant

succession of drives for money for bonds, Red Cross work, etc. It is exceedingly difficult to discriminate. Our people can't keep their mouths shut when they hear of real wrongs in the war work. LIFE WITH AMERICAN MARINES ALONG WESTERN FRONT; THERE ARE JOYS, SORROWS AND PLENTY OF THRILLS

First aid to a marine, at upper left; sounding the gas attack slarm, at upper right, and a German plane brough down by a marine anti-aircraft gun.

There's nothing monotonous about camp life at the front, as the above photos illustrate. The lower picture shows the event that causes the most joy in any camp. It is a picture of a German airplane shot down over an American sector by a marine anti-aircrafe gun. It's a happy day for

the marines whon they can bag a Hun filer. The upper right-hand picture shows a big bell, common at farmhouses, which is serving well at the front. When a Cerman gas attack is reported the bell is sounded by a man on duty. The ringing warns the marine lada in time for them to don gas

The man sounding the warning has his on. The upper left-hand picture shows the only shadow in the day-the wounding of one of the men. But first aid from the Red Cross workers makes comfortable until he can be semeved to a hospital.

Vudor Ventilating Porch Shades re the World's Standard

There are 1,000,000 in use—a silent, convincing proof of their merit. Don't miss another day's full use of your porch. You'll be surprised at the small outlay of money required to enclose your porch with Vudor Porch Shades and make it the most enjoyable part of your entire home, and wonder why you had not discovered Vudors years ago.

We have sold Vudor Porch Shades for many, many years and during all this time we do not recall a single instance of complaint. Each year they have been improved, and this year they are-all made with the patented Vudor Ventilator woven in the top of each shade, which permits the hot air on the porch to pass out through the top of the shade automatically.

Furthermore, Vudor Porch Shades are this year made self-hanging. You simply drive hanging staples opposite corresponding hooks attached to the shade itself and hook up the shade instantly. You can unhook the shade in the fall and lay it away for winter and hook it up again the following spring on the staples already in position-no "handy man" needed-no trouble-no expense.

Vudor Porch Shades last for many years. Any porch anywhere can be readily equipped. We have them in . stock in practically all sizes and in the best selling colors. Will gladly demonstrate them in our Rug and Drapery Section—Second Floor.

THE APEX

Electric Washer

Action, rather than rubbing, is the way to get dirt out of clothes. APEX ELECTRIC WASHERS are built on the one correct principle of action. They secure the maximum amount of action on both the clothes and the water at the same time.

The clothes and the hot soapy, water are thrown back and forth, in the all-metal tub, till the steam and suds have been driven, again and again, through the fabric, loosening and carrying away every particle of dist

The Apex Electric Washer Saves You

MONEY, because it reduces the washing bills: no need of hiring a laundress if you have an APEX. Cuts the soap bills and cuts the fuel bills because no need of boiling clothes.

FROM WORRY, because you can be independent of unreliable laundresses. Any day can be wash day with an APEX. It is always ready to help you or your maid with the washing.

TIME, because with an APEX your washing is finished in a third time less than by any other method. Your maid will have time for other work on washday if there is an APEX in the laundry.

FROM HARD LABOR ON WASHDAY, because the APEX does all the work except hanging out the clothes. It wrings as well as washes.

FROM WEARING OUT THE CLOTHES, because the APEX cleans the clothes without rubbing.
HEALTH AND STRENGTH, because you don't wear yourself all out over a washboard or turning

the wringer.
The APEX saves you so much that you can't afford to be without one a day longer.

The APEX cleans all kinds of clothes by continually forcing hot water, suds and steam through and through the fabric; the very fibre as well as the surface is cleaned. In the APEX the pieces are not crushed, rolled, wadded or dragged around as in other types of machines.

APEX Exclusive Features

No need to boil the clothes if an APEX is used. The scientific action gets all the dirt—even on collar bands, cuffs and skirt bottoms and leaves the pieces as white as if boiled.

Washing powders or dirt-removing chemicals are unknown to the APEX user. Good soap is the only

help needed.

The SWINGING WRINGER, conveniently placed above the tub so that there is no awkward stooping and twisting to use it, is one of the great labor savers on the APEX. Operated in any one of four positions, it will wring clothes from rinse to blue water and to basket while others are being washed. Reversible rolls and safety release make jamming of clothes impossible—Shaft driven.

Machine all metal except the wringer. Inside of tub smooth and as easy to clean as a dishpan.—Absolutely sanitary.

Electric motor drives mechanism by unstretchable raw-hide belt, so no chance to burn out fuses or motor by over loading.

All moving parts guarded or out of the way.

Automatic oiling device on main shaft prevents

Everlasting and trouble proof.
The APEX WASHER is so different, so advanced that you must see and try it to know the great advantages of its improvements. APEX washers have no equals for satisfaction and service.

BARN'S PART IN SOCIAL LIFE

Small Boy Whose Father Possesses One Used to Be a Good Deal of an Autocrat.

In simpler times, and in parts of the United States where simple customs prevailed, the popular small boy of the neighborhood was not necessarily the son of the richest or most promi nent family, but, more likely, the boy in whose yard there was a good rain barrel, a smooth cellar door, or a barn. Some boy, in the small community of a generation ago, was sure to have a father who possessed a barn, and, generally speaking, he intuitively felt his power, and exercised it over the of the town. Wherever he went, the barn stood back of him and gave him support and influence. He could say and do things to the other boys that they would not dare say or do to one another, simply because the boy he said or did things to could see the barn door behind him, open or closed, is the case might be.

To be one of those entitled to admission to the barn was to be in the right set; to be denied the privilege of playing in the barn was to suffer soclal ostracism. .

AMONG WORST OF BAD HABITS

Prograstination, When One Has Work That Must Be Done, Bound to Result in Failure.

He was an excellent workman. Few things were in his specialty which he could not do better than his mates. But he was not a success. Others who had worked at their calling much less time passed him in the upward climb of progress. -His fault, his crime, lay in one thing-he had the "tomorrow"

When he had three days in which do a plece of work, he squandered the first two in idle speculation as to the amount of time absolutely necessary to complete his task. If he decided that, by hurrying, he could perform that task in six hours, he temporized until the beginning of the six-hour period. He was eternally loading and hurrying, eternally wasting time and making time do double service. His work became more and more slovenly. Other workmen surpassed him. Before long he was superannuated.

If you flud yourself figuring on the amount of time you can loaf and still get your work done, watch out. If you do not, the tomorrow habit will get you.-Milwaukee Journal.

New Kind of Honeymoon.

A domestic long in the service of a well-known Alabama family recently gave "notice" of two weeks, explaining that she desired to get married. The mistress managed to secure a successor, but was dismayed to discover that the new servant could not report for cuty until a week subsequent to the time fixed for the wedding of her predecessor. So the present incumbent was asked whether she would not agree to postpone the happy event for a week. This the do-mestic declined to do. However, she said that she didn't in the least mind getting married and continuing the household duties till her successor could put in an appearance. The husband-elect offering no objections, this arrangement was agreed upon, and an hour or so after the marriage

ceremony the domestic was performing her duties just as before. "I presume your husband has returned to his work, as you have done." the mistress chanced casually to re-
